

CROSS STITCH DESIGN MANUAL (GUILD PUBLISHING 1988)

This book will appeal to needleworkers at all levels. It is intended to introduce beginners to the exciting and disciplined medium of cross stitch and to help the more advanced needleworker in the area of charting and design, encouraging them to attempt pieces of work entirely of their own. The design manual gives guidance on the choice of materials and threads; alphabets, motifs and borders; designing small, large and commemorative projects and simple gifts. In one section the author shows how a years work developed. There are ideas too on adapting designs originally produced for other crafts and using them in cross stitch and of course the other way around. There are many charted designs included with 16 pages of color photographs. All the ideas and designs have been tested by Fran Rosess needleworking colleagues and students over a period of 5 years.
