

If your world doesn't end every time someone predicts it will & you're looking forward to making some serious changes that will last, then you're probably one of those who are disappointed that nothing ever changes. Three years in the making, this book speaks to those souls who are tired of waiting for others to make something happen, who have not found answers by looking to the past, and who are looking at the future as an opportunity to pick up the pieces and continue on a new path. Why not? What have you got to lose?!? If not you, then who? If not now, then when? Do not plan against what you fear, but for what you love; because it's not about holding onto things...it's about holding on to each other. –Marshall Masters
