

A Frog in a Pot

This story is about my life. The path that was etched out for me and the road I chose to take. It is about emotional, verbal, and other types of abuse. It shows how insidious it can be. It also shows how we adapt to situations and circumstances. Although it tends to jump from one instance to another, that was how my life was. We have all been in scenarios where we knew what we had to do but weren't sure how much strength we had to endure its solution. I am not by any means proud of my situation; the only thing I can say in my behalf is I learned to survive any way I could.

Jump or Adjust- The Boiling Frog Theory (MohitBatta Blogs) Mohit The boiling frog is a parable describing a frog being slowly boiled alive. The premise is that if a frog is put suddenly into boiling water, it will jump out, but if the frog is put in tepid water which is then brought to a boil slowly, it will not perceive the danger and will be cooked to death.
