

With both Monetarist and Keynesian economic theory so closely bound up with employment levels and inflation, the contrast between the two models is here given thorough examination in light of real post-war data. Following the development of Monetarism as a reaction against Keynesian analysis, Drobny focuses on the importance of relative pricing within each approach as a basis for comparison. Drawing from both theories, the author forms models of labour demand and applies the conflicting results to a series of pragmatic tests, thereby highlighting the usefulness and the limitations of each standpoint.

The Victorian catalogue of household goods: A complete compendium of over five thousand items to furnish and decorate the Victorian home, The 2007 Import and Export Market for Plates, Bricks, Building Boards, and Tiles of Asphalt or Similar Material in Austria, Living Awake: Forty Days Toward Renewal, The Adventures of Huckleberry Finn, Sonic the Hedgehog #282, Economics: Theory & Practice., The Middle East,
