

It Has Served Us Well, This Myth Of Christ: Religion: The Ultimate Deception

It has served us well, this myth of Christ a statement once made by Pope Leo X and one difficult to dispute when you examine the evidence on offer. You will learn from this book how bible characters and stories as well as those of other religions, have either an astronomical or genetic basis. The evidence in this book suggests that the characters are not real people; that their creation is a deliberate act of concealment of truth by the initiates, the chosen few, the keepers of ancient knowledge, controlling the global power strings even today through governments, corporations, media, the music and film industry and even royalty. History is a lie and religion is a control system of deliberate divide. Religion has the world at war and the global population at odds; just as planned; even as far back as the ancient Pharisees. Once these secret teachings have been exposed then the fraudulent and deceptive grip upon the minds and lives of the masses will be gone and no more will the myth of Christ serve them well. Many will not want to see or hear the contents of this book; many will curse and claim that it has come from the devil. But for those who do; welcome to these new and esoteric insights, a new language known only previously by the select few. This book flies in the face of popular culture and belief. After reading this book, will you be willing to review your own? Welcome to the intriguing world of secret codes and deeper meanings, welcome to the secrets of space and the body universe.
